TIME TO INSTALL A PIPE UNDER A 4 FT.SIDEWALK	2 MINUTES TOPS INCL. ROCKS	A PERSON USING ONE OF THESE TOOLS WOULD STILL BE UNLOADING THE EQUIPMENT & CONNECTING HOSES AND CORDS TO WATER AND POWER SOURCES AND WE WOULD BE DONE and GONE!!			

The competitors equipment requires an array of additional support equipment such as compressors, drill motors, & generators in addition they also require bulky accessories to go with them such as hoses,extension cords, wrenches Etc...

The errosion which takes place when these tools are used, undermines existing pavement which creates settling problems and creates additional work & downtime by having to wait for the soil to drain & cleaning up the mess.

IN SPITE OF THE ABOVE MENTIONED, IF ROCKS OR BURRIED DEBRIS ARE ENCOUNTERED THE WORK STOPS!!

With The Bullet Mole® All of this is avoided. And the job completed a head of schedule !!
